"The problems confronting the current justice and prison system are complex and multifaceted and require both short- and long-term solutions."
-Professor Sir Peter Gluckman, 2018

In this course each speaker will identify various pressure points in the New Zealand legal system, and then consider ways we can better deliver justice. The course will begin by considering the underlying causes of crime and then across six weeks, explore various ways to disrupt the prison "pipeline". This will include community initiatives, restorative justice principles, and therapeutic courts. We will also learn about ways to prevent the legal system from convicting an innocent person. In the final session, we will turn to the civil justice system and briefly examine the unmet legal need in New Zealand, and explore various initiatives to improve access to justice.

All applications must be received by **Friday 3 May, 2019**. You will receive a response to your application by **Monday 13 May, 2019**.
