

2021 History of Medicine and Science Lecture Series

Professor Terence Doyle
Department of Medicine
will present

Sir John Eccles and the History of the Nerves

John Eccles was Professor of Physiology at Otago from 1944-1951 and was awarded the Nobel Prize for his discoveries in nerve function. This talk will look at what led up to and resulted from his work. It will also consider his philosophy of mind and his collaboration with the philosopher Karl Popper.

John Arnaud Bell (Blue) Lecture Theatre, Dental School
Entrance on Frederick St, Dunedin
Thursday 29th July 2021 at 5.15pm
