

Looking for heart attack survivors to participate in study

We are seeking up to 20 participants for a research study looking at the impact of information videos on the understanding of people's conditions and medications following a heart attack.

If you, a family member, or a friend are over the age of 18, have had a heart attack within the last 5 years, and are clinically stable (no longer in hospital) please get in touch.

Participation will take around an hour and a half and involves watching short videos and a focus group discussion about your opinions of the videos. If you would like to find out more, email Dr Amber Young: amber.young@otago.ac.nz.

A \$50 supermarket voucher will be given to participants as a thank you for participating.
