

Dunedin has joined the many cities in the world in which a University of the Third Age has been founded

Beginning in France in the mid seventies the U3A movement has now spread to most countries and has many hundreds of thousands of members.

U3A is a response to the idea that human life is divided into three periods: firstly, childhood and schooling; secondly, child rearing and work; and thirdly retirement.

The third age is seen to provide the greatest opportunities for learning and understanding because it is during this period of retirement that the idea of a university as a community of those who seek greater understanding through learning can be put into practice.

The unique characteristics of U3A

- Learning topics are selected by the members
- Indepth courses are planned by members
- Opportunities for reading, research and discussion are provided
- Presenters/facilitators are usually members of the groups
- The company of others who enjoy learning is ensured
- The atmosphere for learning is informal and friendly
- There are no examinations
- There are no compulsory activities
- Courses take place during daylight hours
- Costs are minimal and within the reach of everybody

ADMINISTRATION

Dates: Fridays

Time: ~~2.15pm - 4.15pm~~ 10-12

Fee: \$40.00

Tea and coffee provided

Enrolments

You are able to enrol in more than one programme (subject to numbers).

The Programme

This series of lectures looks at some of the energy sources available to us, how we use them and whether we use them in the right manner.

Modern man, compared to his caveman ancestors and their wood fuelled fires, is using more and more energy of all kinds. With the continuing increased costs of these energy supplies a review of the current position should be a useful and interesting exercise for members.

Each speaker will present a viewpoint covering their area of expertise which may help you to evaluate your own use of energy.
