

**Dunedin has joined the many cities in the world in which a University of the Third Age has been founded**

Beginning in France in the mid seventies the U3A movement has now spread to most countries and has many hundreds of thousands of members.

U3A is a response to the idea that human life is divided into three periods: firstly, childhood and schooling; secondly, child rearing and work; and thirdly retirement.

The third age is seen to provide the greatest opportunities for learning and understanding because it is during this period of retirement that the idea of a university as a community of those who seek greater understanding through learning can be put into practice.

**The unique characteristics of U3A**

- Learning topics are selected by the members
- In depth courses are planned by members
- Opportunities for reading, research and discussion are provided
- Presenters/facilitators are usually members of the groups
- The company of others who enjoy learning is ensured
- The atmosphere for learning is informal and friendly
- There are no examinations
- There are no compulsory activities
- Courses take place during daylight hours
- Costs are minimal and within the reach of everybody

**ADMINISTRATION**

**ANTARCTICA**

Dates: 6th June to 11th July

## ANTARCTICA

### The Programme

The great white continent draws ever more people to see, explore and study it. Intriguing aspects are being examined by staff in five Otago University departments, both on the ice and in Dunedin. These important activities will be described by staff scientists, some just back from the south. They include the biological effects of cold, fauna both large and microscopic, what happens during freezing and thawing, and tolerance to freezing.

## ANTARCTICA
