This course explores the growth and changes over about 150 years in the life of Dunedin buildings. Since early European settlement the city of Dunedin has grown according to the needs of an increasing population with requirements for buildings that served for housing, commerce, industry, communications, transport, health and education. As prosperity increased or waned the types of buildings also changed. Many early buildings survive today but a huge variety of more recent buildings have also been added or have replaced older ones.

All applications must be received by **Thursday 8 February 2018**. You will receive a response to your application by Monday 19 February.

Please contact the U3A Board Secretary ([info@u3adunedin.org.nz](mailto:info@u3adunedin.org.nz), 453 4721) with any queries.
